Many of our engagements involve matters in which our clients face significant public attention. The following is a list of news stories about the firm, our clients, cases and the results we have achieved.

CFAAR Hong Kong Presents Seminar on “Guardrails to a Global Digital Asset Hub”

June 30, 2023

As Hong Kong establishes its standing as a global center for cryptocurrencies and other virtual assets, how has its regulatory approach evolved? The Crypto Fraud and Asset Recovery Network (CFAAR) Hong Kong Chapter will explore this question in its latest seminar and networking event, taking place on Thursday, July 13, titled “Guardrails to a Global Digital Asset Hub: The SFC’s New Virtual Asset Regime.”

Julia Leung, the Chief Executive Officer of the Hong Kong Securities and Futures Commission (SFC), will deliver a speech addressing the SFC’s new regulatory approach to virtual assets, and how it hopes this will help reduce fraud in virtual asset markets while enabling Hong Kong to become a global virtual asset hub.

CFAAR seeks to work with the crypto industry, government and public to address rising crypto fraud, and Kobre & Kim’s Calvin Koo is a co-founding member of the Hong Kong Chapter.
